5 April 1960

MEMORANDUM FOR: Assistant Director, Central Reference

SUBJECT : Semi-Annual Report to President's Board of Consultants
on Foreign Intelligence Activities

The following is submitted for consideration as part of
OCR's contribution to subject report:

Interagency Cooperation

Under the auspices of the USIB Committee on Documentation, the revised edition of the Intelligence Subject Code and the new Area Classification Code were published in February 1960. Copies have been distributed to the USIB agencies. Studies are presently underway in CIA and the Air Force to determine how and when the new codes can be put into effect for indexing intelligence reports into their respective systems.

It is hoped that CIA can continue using Air Force coding as "input" into the CIA Intellofax System so there will be no need for "duplicate" coding of Air Force reports.

25X1

Chief, Document Division
